

Thermal and acoustic insulation that saves energy

The Expanded Corkboard - ICB is the appropriate insulating product, for this kind of systems, as it corrects, if not all, most of the thermal amplitudes.

The use of Expanded Cork Board - ICB is ideal due to its long durability and the fact that it represents an economical solution which meets all the needed requirements.

INSULATION OF SLOPING ROOFS - NOT VISITABLE ATTICKS

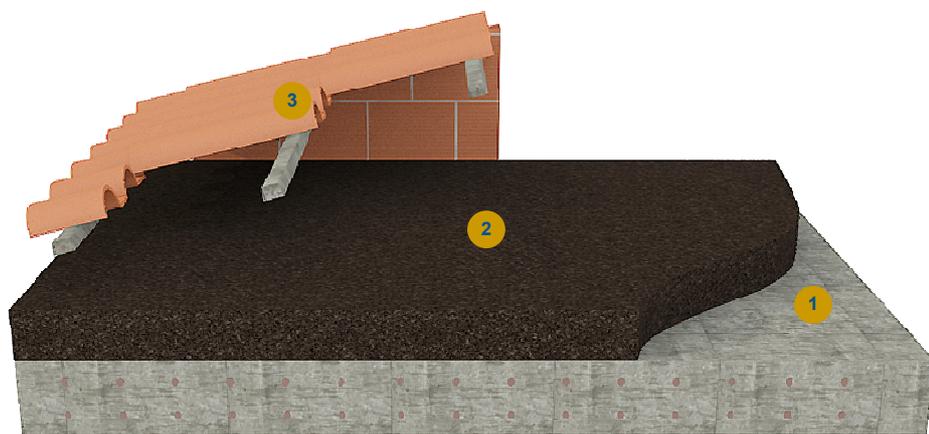

Benefits

Effective thermal insulation and soundproofing, resulting in energy savings

Besides being a good insulator, it has an unlimited durability

Its characteristics remain unchanged and it is easily recyclable

High transpiration capacity

- 1 Slab
- 2 Expanded Cork Board - ICB or Regranulate of Expanded Cork
- 3 Tile
