

Real thermal and acoustic insulation

The application of Expanded Cork Board, in the insulation of interior walls, finished with dry wall, provides an excellent thermal insulation for a long period of time added by an excellent acoustic comfort.

INSULATION OF INTERIOR WALLS (DRY WALL)

- 1 Roughcast 2 Expanded Cork Board - ICB 3 Risers 4 Dry wall

Benefits

- Comfort - Thermal insulation and soundproofing
- Dimensional stability of the material
- Natural product (healthier)
- Excellent transpiration capacity
- Effectiveness without time limit
